DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-5, 22-25 and 40-48, drawn to an inactivated bovine rotavirus and coronavirus vaccine, classified in class 424, subclass 202.1, 215.1, 221.1.
- II. Claims 1, 2, 5-14, 22-27, 30-35 and 40-48, drawn to an inactivated bovine rotavirus and coronavirus vaccine with at least one vaccinal bacteria, classified in class 424, subclass 201.1.
- III. Claims 15-24, 28, 29 and 36-48, drawn to an inactivated coronavirus and at least one vaccinal bacteria, classified in class 424, subclass 201.1, 221.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions comprise a different populations of distinct microorganisms that induce immunity against different viruses and/or bacteria. Group I comprises rotavirus and coronavirus, but does not comprise a bacteria and cannot induce an immune response against a bacterium. While both groups II and III comprise coronavirus and bacterial antigens, only groups I and II comprise rotavirus antigens. Therefore, groups I-III comprise distinctly different antigens and each composition is used to vaccinate different populations of subjects, depending on the viral and bacterial exposure of each population.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
